# FIN LED Under Cabinet Light

Models ULED32, ULED52, ULED65

## STEP 1

Scribe or draw a straight line centered on the mounting surface for the Under Cabinet LED. Then mark each mounting point for your specific model.

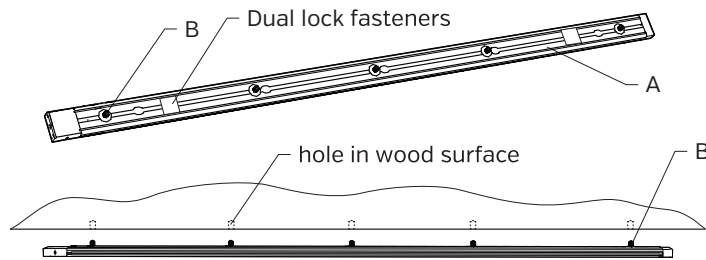

Mounting Diagram

## STEP 2

For **wood surfaces**: drill holes with the drill bit provided [C] in the locations shown on the Mounting Diagram above.

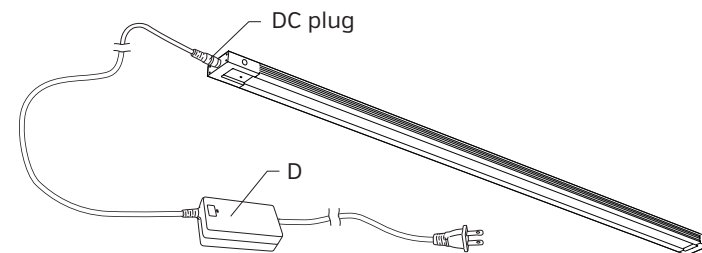

Peel film off 2 dual lock fasteners. Slide retaining clips [B] one at a time into back side of task light [A] based on the diagram, align clips with mounting holes and press firmly to install.

## STEP 3

Once the light is installed, connect the power supply [D] via the DC plug to the LED. Then insert the electrical plug into the outlet.

Please consult the furniture installation guide for best practices on routing wires.

## STEP 4

Slip User Guide around LED light.
